LAN, Coax, and Modular Crimp Tools and Sets

The tools you need for accurate LAN, Coax, and Modular connections.

Technically Speaking

Black Box offers six different tool kits to help you make accurate LAN, Coax, and Modular connections.

Each kit contains a crimp tool which features three levels and a notched blade to protect center conductors. Also, all kits contain an Allen wrench for setting spring tension and a die set.

You can also buy components separately.

Coax Dies, for hex crimping, are numbered by wire size, not pin type. Connector and Crimp Pins are available in convenient bulk packages.

- ▶ *Make accurate LAN, Coax, and Modular connections.*
- ▶ *Each kit contains a Blank Crimp Tool Frame.*
- ▶ *Order one of six kits or buy components separately.*
