Patch Panels

Keep your cabling organised.

Key Features

- ▶ Available with extra designation labels.
- ▶ Mounting slots are ANSI/EIA-310-C compatible.
- ▶ Cable ties are included with each Patch Panel.

Technically Speaking

With Patch Panels, you can keep your cables organized. They are available in 16, 24, 32, 48, or 64 ports.

Since they're so easy to snap in, you can customise the configuration of your panels to meet the needs of your application. To make changes, just remove the existing coupler from the front with a flathead screwdriver and insert the new one.

And low-cost blanks are available to fill empty ports. Oversized Patch Panels are also available with more labeling space above each coupler opening.

For easy identification, Plastic Holders with Paper Strips and Designation Labels are available.
