CAT5 Modular Plug Kit

Complete tool and die set for RJ-type CAT5 modular plugs.

Figure 1. The tool terminates CAT5 modular plugs.

Key Features

- ▶ Comes complete with all the dies you need.
- ▶ Plugs exceed EIA/TIA 568A and TSB-40A requirements.
- ▶ Each tool includes a wire cutter and a jacket insulation stripper to prepare flat cable.
- ▶ Everything you need to cut/strip/terminate CAT 5 RJ-type cable.

Technically Speaking

The CAT5 Modular Plug Kit comes complete with a Termination Tool, a die set, and 100 eight-position plugs. The tool terminates CAT5 modular plugs like the one shown in **Figure 1** above. The tool can cut and strip round cables. For 8-wire flat cable, each tool includes a wire cutter and jacket-insulation stripper.

Cutting and stripping the cable is a breeze with this tool.

Cut and strip the cable as follows:

- Flat oval cable—use the CUT and STRIP slots of the termination tool.
- Jacketed round cable—trim and strip using the tool.
- Shielded cable—prepare according to requirements.
- High-performance cable—prepare according to requirements.

Before terminating a plug, double-check to be sure cable and plug are compatible, and that cable polarity is correctly maintained for your specific application.

For these and other components...

Call our expert Technical Support Staff for all your cable and connector needs. They'll help you find the best equipment for your application.
