NETWORK SERVICES

SOUNDSTATION PREMIER

Unsurpassed clarity and performance is yours with the ultimate audioconferencing phone.

Key Features

- ▶ ***This full-duplex system virtually eliminates echoes, clipped words, and reverberation.***
- ▶ ***Intelligent processor filters out background noise.***
- ▶ ***Keypad operates just like a handset phone.***
- ▶ ***Optional infrared remote puts total control at your fingertips.***

For the finest sound in group audioconferencing, choose the SoundStation Premier[®]. It sets a new standard in easy-to-use, full-duplex audioconferencing quality by virtually eliminating echoes, clipped words, and reverberation.

The SoundStation Premier allows you to effectively listen to meeting participants as they are speaking, even in a room full of people. The system's speaker provides clear, high-fidelity sound so you don't miss a word. And the SoundStation Premier's loudspeaker volume has enough "oomph" to fill almost any size room.

The SoundStation Premier delivers unsurpassed convenience with a 16-character LCD for Caller ID capability, time of day, and length of call. The console (featuring hold, redial, and mute buttons) connects to a wall jack via a single cord.

What's more, an optional infrared remote-control wireless microphone system and extended microphones with separate mute buttons allow participants to move freely about the room without disrupting the conversation.

The SoundStation Premier expands to meet your needs. You can use up to two speakers and eight microphones, including an integrated 900-MHz wireless microphone. For example, a large room system might require the SoundStation Premier with extended microphones and infrared remote. To upgrade this system, add Extended Hypercardioid Microphones.

Why Buy From Black Box? Exceptional Value. Exceptional Tech Support. Period.

Recognize any of these situations?

- You wait more than 30 minutes to get through to a vendor's tech support.
- The so-called "tech" can't help you or gives you the wrong answer.
- You don't have a purchase order number and the tech refuses to help you.
- It's 9 p. m. and you need help, but your vendor's tech support line is closed.

According to a recent survey by Data Communications magazine, 90% of network managers surveyed say that getting the technical support they need is extremely important

when choosing a vendor. But even though network managers pay anywhere from 10 to 20% of their overall purchase price for a basic service and support contract, the technical support and service they receive falls far short of their expectations—and certainly isn't worth what they paid.

At Black Box, we guarantee the best value and the best support. You can even consult our Technical Support Experts before you buy if you need help selecting just the right component for your application.

Don't waste time and money—call Black Box today.

Specifications

Physical Architecture: Tabletop console contains all audio processing functions and alphanumeric keypad; Wall module contains power and telephone line interfaces; Cables consist of 25-ft (7.6-m) single-cord connection to tabletop console and 7-ft.
