## NETWORK SERVICES

### POLYCOM<sup>®</sup> VOICESTATION<sup>™</sup> 100

***VoiceStation 100 provides big sound in smaller rooms.***

#### Key Features

- ▶ **Conference speakerphone for your office.**
- ▶ **Full-duplex, natural conversations.**
- ▶ **Echo-cancellation software automatically adjusts to acoustics of any small room.**
- ▶ **Three mics for 360° room coverage.**
- ▶ **Enables multipoint conference calls.**
- ▶ **Mute, hold, and redial features.**
- ▶ **Connect a laptop to VoiceStation 100's data port.**

If you and a few others need to make a conference call, conduct it from the cozy confines of your office—instead of a cavernous conference room—with the phone that's built for you!

The Polycom VoiceStation 100 is affordable enough for use in just about any office. And it enables you to conduct remote meetings that are as natural as speaking face to face.

VoiceStation 100 replaces inferior handset speakerphones that prevent natural two-way communication necessary to maximize productivity and conduct effective business or sales calls. With Polycom's full-duplex Acoustic Clarity Technology<sup>™</sup>, VoiceStation 100 provides natural, free-flowing conversation so everyone can hear and be heard clearly. There's no need to raise your voice or repeat words or phrases. For

offices and smaller meeting areas, VoiceStation 100 by Polycom is the speakerphone you need!

#### **Clarity improves productivity.**

Polycom's voice technology facilitates simultaneous two-way communication and provides maximum clarity on both ends of the conversation.

Self-adjusting echo-cancellation software automatically adjusts to the acoustics of any small room, minimizing reverberation and optimizing audio quality. Unlike some audioconferencing systems, VoiceStation 100 doesn't require an annoying burst of white noise to learn the acoustics of a room.

Three microphones provide 360° room coverage, enabling complete microphone coverage for all meeting participants seated around the system.

A robust, high-quality speaker enables everyone to hear clearly. With a peak volume of 85 dB at 0.5 meters, VoiceStation 100's speaker is significantly louder than those found on other speakerphones.

When you add up all these features, VoiceStation 100 is the teleconferencing solution that boosts clarity and productivity. Save time, work hands free, and get more accomplished!

#### **Loaded with features.**

Set up multipoint conference calls yourself, using VoiceStation 100's Flash key. The Flash key enables you to access special features in your phone system, such as conference-bridging services. It's money-saving convenience at its best!

(continued from page 1)

The Redial key saves time by automatically recalling and dialing the last phone number called. There's no more searching for phone numbers through daytimers or PDAs. One touch gets everyone connected again.

Pressing the Hold key disables the speaker and all microphones and places the caller in a holding pattern. VoiceStation 100 also enables another phone using the same line in parallel to retrieve a call on hold.

The Mute key deactivates the microphones while you can still hear the speaker. This function allows you and your associates to discuss a matter in private before resuming the phone conversation.

**It's all about making connections.**

Multiple devices also can access one telephone jack! You can connect a laptop computer, fax machine, or another analog phone to VoiceStation 100's data port—without unplugging the conference speakerphone from the telephone jack.

**Taped before a live audience.**

VoiceStation 100 also includes an RCA® output jack that enables you to capture audio output on a tape recorder, stream a meeting over a Webcast, or archive conversations to disk.

(Note that California, Connecticut, Florida, Illinois, Maryland, Massachusetts, Michigan, Montana, Nevada, New Hampshire, Pennsylvania, and Washington require the consent of all parties in a phone conversation to permit its recording.)

**Sets up right out of the box.**

Easy to install in less than 60 seconds to any analog line, VoiceStation 100 sets up fast and you can begin using it immediately. Bring the power of a full-duplex speakerphone to your office today, with the Polycom VoiceStation 100!

## Why Buy From Black Box? Exceptional Value. Exceptional Tech Support. Period.

**Recognize any of these situations?**

- You wait more than 30 minutes to get through to a vendor's tech support.
- The so-called "tech" can't help you or gives you the wrong answer.
- You don't have a purchase order number and the tech refuses to help you.

- It's 9 p.m. and you need help, but your vendor's tech support line is closed.

According to a survey by Data Communications magazine, 90% of network managers surveyed say that getting the technical support they need is extremely important when choosing a vendor. But even though network

managers pay anywhere from 10 to 20% of their overall purchase price for a basic service and support contract, the technical support and service they receive falls short of their expectations—and certainly isn't worth what they paid.

At Black Box, we guarantee the best value and the best

support. You can even consult our Technical Support Experts before you buy if you need help selecting just the right component for your application.

Don't waste time and money—call Black Box today.

## Specifications

**Audio Bandwidth:** 200 to 3500 Hz

**Environmental Conditions:**

Operating Temperature: 41 to 104°F (5 to 40°C);  
Humidity: 20 to 85%, noncondensing
