ServSwitch™ Jr-LP

Key Features

- Extremely small – 81 x 107 x 20 mm.
- Complete set including high quality cables.
- High resolution up to 1920 x 1440 @ 75Hz.
- Supports PS/2- and wheel mice as well as Audio.
- Easy to install and simple push button or keyboard switching.
- Full keyboard and mouse emulation.

KVM-Switching as simple as it should be at highest quality level. The ServSwitch Jr-LP combines it!

The package includes the 2-Port switch as well as two flexible 4-in-1 PS/2-KVM+Audio cables in 1,5m length.

To reduce clutter they are connecting via a single D-Sub 25 connector into the switch.

The low-profile form factor makes the Jr-LP fit into the smallest space. It does not require any external power supplies as it receives its power via the CPUs keyboard interface. Keyboard and mouse protocols are fully

emulated to guarantee proper functionality when switching back and forth. LEDs indicate its power and switching status. Simple keyboard hotkey commands allow to switch between the CPUs. Alternatively a front button switch may be used. Audio channels can be switched independent from the KVM signals. The high video bandwidth makes the Jr-LP the ideal solution for demanding users of graphic intensive computing.

Specifications:

Size: W 81 x D 107 x H 20 mm

Connectors:

CPU:

(2) D-Sub 25 female

KVM:

(1) D-Sub 15 HD female for Video

(1) MiniDIN 6-pin female for keyboard

(1) MiniDIN 6-pin female for mouse

(1) 3.5mm jack for audio

Weight:

0,4 kg

Enclosure:

Rugged metal
