▶ Supports 64 million colours

▶ Includes a high-speed USB connection

Overview

The D-Link DU-C300 WebCam is a High Resolution USB Digital Video Camera. Video with 64-million colours at 30 Frames per second by using the high bandwidth of USB interface and advanced light-sensing CMOS technology. As a fully contained unit, no video capture card or additional hardware is necessary. The unit simply attaches via a standard USB type A connector to a PC or downstream USB hub. Installation is as simple as plugging the USB cable into the back of your PC. USB means you don't have to open your PC, find an empty slot, work through interrupt conflicts, and all the other problems that attend cameras with capture cards. Also. installation on notebooks and laptops is as simple as installation on desktop machines. The WebCam is much more than a PC digital Camera; combining state of the art optical technology, hands free Audio Microphone, and complete audio visual software - it is a complete audio visual communications system.

Using the WebCam, you can turn your PC into an Internet audio visual phone so it gets you closer to family and friends, and with a 300K resolution means the WenCam delivers a great quality picture. In Video-Conference mode, you can do one on one chats or full meetings with Group Chatting features. The WebCam comes complete with all the necessary hardware and software for use. Software is included with the unit to record digitally, directly to a PC's hard drive, record digital video for attachment to an e-mail, capture still frames, and also set up motion-sensing video recording. The included hands free lapel microphone combines with a PC's sound card to allow audio to be added to recorded video. In addition, the WebCam draws power directly from the USB bus making it ideal for use with a laptop or other portable computer.
