Firmware revision information for:
BlackBox Agility ACR1000A

Version 1.9.12071

Original Shipping release

Version 1.10 to Version 1.13

These were not released externally

Version 1.14.14363

In order to access the new configuration parameters iPATH 1.6 must be used

1. Added new hot plug detect options

2. Added auto detect DDC clock speed to solve a no video issue with Austin Hughes Rackdraw.

3. Added new cable length and PLL settings on TX to cope with poor quality DVI video signals. This can be found under video configuration on the TX configuration page.

4. Added support for CEA video timings.

5. Added USB country code functionality so 11 international keyboard layouts are now supported; gb, ch_de, ch_fr, de, es, fr, it, nl, no, se, us.
   This can be found on the RX configuration page.

6. Added support for Free-flow mouse within OSD menu

7. USB boot mode protocol is now fully supported

8. Added a Dummy boot keyboard

9. Added USB speed select functionality USB full/low speed and USB High speed is now selectable.

10. Added ability to change the reported USB hub size. The supported USB hub size is 13 by default there is now an option to change this to a 7 port usb hub.

    There is a new USB configuration page on the TX configuration parameters.
