DTX5000-CTL
Revision 2.0.0
Release Notes
May 26th 2008

This document outlines:

1. DTX5000-CTL System Firmware Version and Compatibility
2. Important Installation Notes
3. How to Update Firmware
4. Enhancements
5. Fixes
6. Notes

===
DTX5000-CTL System Version and Compatibility
DTX5000-CTL Version 2.0.0 Build# 5430
===
Version 2.0.0 of DTX5000-CTL is intended to be used in a system with the following system component revisions:

- DTX5000-T Revision   3.0.0.16
- DTX5000-R Revision   3.0.0.16
- DTX5002-T Revision   3.0.0.16
- DTX5002-R Revision   3.0.0.16

The following versions of the system components are upgradeable using the DTX5000-CTL version 2.0.0:

- DTX5000-T Revisions   2.1.0.13, 2.0.0.9
- DTX5000-R Revisions   2.1.0.13, 2.0.0.9

The following revisions can be upgraded to version 2.0.0.5430:
- 1.0.1.5070
- 1.0.2.5110
- 1.0.3.5251
- 1.0.4.5260

===
Important Installation Notes
===
When the receivers and transmitters are to be upgraded by the DTX5000-CTL, it is recommended that the DTX5000-CTL is upgraded prior to upgrading the receivers and transmitters.

===
How to Update Firmware
===
1. Browse to the IP address of the DTX5000-CTL from a compatible computer.
2. Go to the DTX5000-CTL System tab, select the Manager Server sub-menu and then select the Management Appliance Upgrade facility.
3. You are prompted to browse to the location of the upgrade image.
4. Following the upgrade instructions as provided by the upgrade wizard.

===
Enhancements
===
1. This release adds support for "matrix mode" on the DTX5002-R/DTX5002-T, i.e. the ability to connect to and switch between target computers directly from the DTX5002-R Receiver.
2. Switching times have decreased to approximately 6 seconds.
3. Introduce the ability to reboot the DTX5000-CTL from the browser interface.
4. Introduce the ability to manage firmware files for all DTX system components.

==
Fixes
==

1. On the previous version, it was possible for a user to be denied access to a computer even though that computer was available.

==
Notes
==

1. Before backing up or restoring the database, it is recommended that there be no active sessions present. After restoring the database, it is recommended that you delete all units and add all units again.
