

iView

Cross-Platform Management Application Installation Guide

This manual contains information to help with the installation of the iView cross-platform management software.

iView gives network managers the ability to monitor and control the manufacturer's products from virtually any SNMP management platform. iView can also function as a snap-in module for companies who do not use SNMP management software.

System Requirements

To run *iView*, the Management PC must be equipped with the following:

20 MB free disk space, 32 MB RAM

as well as one of the following operating systems:

Windows[™] 95/98/NT/2000

Installation Instructions

Install the *iView* application using the following procedure. You can install iView for single or multiple types of hardware devices. You can choose the type of hardware device during the installation.

> **NOTE**: *iView*'s automated installation utility works only with 32-bit Windows operating systems or with OpenView. For installation procedures, please contact Black Box at (724) 746-5500

NOTE: If you install iView for only one type of hardware device, you may run the SETUP.EXE again later for another type of device.

Installing iView

- 1) Insert the *iView* CD into your CD-ROM drive (usually, Drive D:)
- 2) The installation utility will launch automatically. If this does not happen, choose Start, Run, Browse from the Windows Start menu (bottom-left corner of the screen). Locate SETUP.EXE in the D: directory. Click the **Open** button. In the **Run** dialogue box, click OK.
- 3) The Welcome screen of the *iView* installation utility should appear. Click Next to continue.
- 4) When the Software License Agreement for *iView* appears, click Yes
- to accept the agreement and continue. NOTE: You must accept this license agreement or the setup process will be cancelled.

- 5) The User Information window will now appear. Enter your name, your company's name, and the iView serial number (provided on your CD case.) Click Next to continue.
- 6) Follow the on-screen directions for the following windows. In each case, click **Next** to proceed. When you reach the last dialog box, click Finish to complete the installation or click Back to change any of the information you entered earlier.

You now have a Program group and icons for *iView*. They are located under: Start, Programs, iView. To run iView, choose Start, Programs, iView, and click on the *iView* icon for the module you want to manage (e.g. iView for ipMux).

> **NOTE**: Be sure to restart your computer after completing the installation or *iView* may not function properly.

Note: Please contact Black Box Corporation for warranty information.
