

PC Cable Quick Check Pro

1. Specifications

User Controls: (1) Test button, (1) Cable Mode button, (1) Power ON/OFF switch

Connectors: (2) BNC coax, (2) 6-pin mini-DIN female, (2) 4-pin mini-DIN female, (2) RJ-45, (2) 4-pin USB Type B, (2) 4-pin USB Type A, (2) 5-pin mini USB, (2) 6-pin FireWire®, (2) 4-pin FireWire, (2) DB9 male, (2) DB9 female, (2) DB15 male, (2) DB15 female, (2) HD15 male, (2) HD15 female, (2) DB25 male, (2) DB25 female, (1) Centronics®

Indicators: (168) LEDs: (1) Power, (2) Shield, (72) Centronics pins 1–36, (50) DB25 pins 1–25, (9) DB9 male pins 1–9, (15) DB15 pins 1–15, (15) HD15 pins 1–15, (4) Coax: Pass, Open Conductor, Open Shield, Short

Size: 11.8" H x 6.4" W x 11.5" D (30 x 16.3 x 29.2 cm)

Weight: 1.8 lb. (0.8 kg)

TRADEMARKS USED IN THIS MANUAL

FireWire is a registered trademark of Apple Computer, Inc.

BLACK BOX and the Double Diamond logo are registered trademarks of BB Technologies, Inc.

Centronics is a registered trademark of Centronics Corporation.

HP and LaserJet are registered trademarks of Hewlett-Packard.

Pentium is a registered trademark of Intel Corporation.

AT, IBM, and PS/2 are registered trademarks, and XT is a trademark, of International Business Machines Corporation.

Diamond Scan and Mitsubishi are registered trademarks of Mitsubishi International Corporation.

Sony is a registered trademark of Sony Corporation.

Star Micronics is a registered trademark of Star Micronics America, Inc.

Wyse is a registered trademark of Wyse Technology.

Any other trademarks mentioned in this manual are acknowledged to be the property of the trademark owners.

2. Overview

2.1 Introduction

The PC Cable Quick Check Pro checks continuity and wiring configuration for DB9, DB15, DB15 HD, DB25, Centronics, 6-pin mini-DIN PS/2®, 4-pin mini-DIN S-Video, 4- and 6-pin 1394 FireWire, USB, Mini USB, RJ-11, RJ-12, and shielded and unshielded RJ-45 telephone cables up to 50 feet (15.2 m) long.

2.2 What's Included

Your package should include the following items. If anything is missing or damaged, contact Black Box at 724-746-5500.

- PC Cable Quick Check Pro
- 9-volt battery
- This users' manual

2.3 The PC Cable Quick Check Pro Illustrated

The PC Cable Quick Check Pro (see Figure 2-1) has several connectors on its left and right sides. Each side contains a BNC coax, a 6-pin mini-DIN female, a 4-pin mini-DIN female, an RJ-45, a 4-pin USB Type B, a 4-pin USB Type A, a 5-pin mini USB, a 6-pin FireWire, and a 4-pin FireWire connector. The tester's front panel contains pairs of serial connectors, including DB9, DB15, HD15, and DB25, plus one Centronics connector. Attach each end of the cable you want to test to both sides of the tester, or to both matching connectors on the front panel. It accurately tests cables up to 50 feet (15.2 m) long.

NOTE

The RJ-45 connectors also test RJ-11 and RJ-12 cables.

The tester also has 168 LEDs, a Test button, a Cable Mode button, and a Power ON/OFF switch.

Figure 2-1. Identifying the PC Cable Quick Check Pro’s connectors.

NOTE

The tester has matching connectors on its left and right sides. In the illustration above, only the connectors on the right side are shown. The tester also has matching serial connectors (but only one Centronics connector) on its front panel and LEDs for each connector’s pins.

3. Operation

1. Make sure the 9-volt battery is installed and the switch is ON. (The battery compartment is located on the back of the tester.) When replacing the battery, use only a standard 9-volt.
2. Connect the cable you want to test to the corresponding connectors on the tester's left- and right-hand sides or front panel.
3. Press the Cable Mode button repeatedly until the red LED next to the chosen connector indicates that the proper connector size is selected.
4. To begin testing, press the Test button and hold it for 5 seconds. If you prefer to use the tester manually, simply step through the testing process by pressing Test for each pin.

NOTE

The tester automatically powers off after 30 seconds of non-use.

5. The cable configuration is required to confirm the wiring configuration. Standard cable applications and wiring configurations are listed in **Chapters 5 and 6**, or you can consult your manufacturer's manual.
6. If you have a custom cable and need to determine the scheme, use a "known good cable" and record the pinout for your reference.

4. Cable Configuration

NOTE

Cable configurations are provided for sample reference only. Contact the cable manufacturer for specific configuration schemes.
