GigaStation2 Surface-Mount Housing Boxes and Inserts

Size: WPT901: 3"H x 3"W x 1.5"D (7.6 x 7.6 x 3.8 cm); WPT902: 5.2"H x 5.2"W x 1.5"D (13.2 x 13.2 x 3.8 cm); WPT903: 1.5"H x 5.2"W x 7.75"D (3.8 x 13.2 x 19.7 cm)

The GigaStation2 Surface-Mount Housing Boxes and Inserts work with raceways (part numbers 36910, 36948, and 36949) to protect and hide cable without installing them inside walls. The boxes and inserts are supplied in packages of 10. Choose from three box models: a 2-port box (WPT901), a 4-port box (WPT902), or a 6-port box (WPT903). The inserts come in one- or two-port models (FMT901 or FMT902); a blank insert (FMT900) is also available.

Affix the housing boxes to solid surfaces such as drywall, wooden baseboards, or modular furniture partitions. All housing box models also feature easy-to-remove knockouts that make them fully compatible with raceways (part numbers 36910, 36948, and 36949). The two larger housing boxes also feature integral fiber storage loops that maintain bend radius requirements and provide 1 meter (3.3 ft.) of fiber storage.

To install the inserts, simply snap them into place. To remove them once installed, insert a flat screwdriver in the notches and pry away the insert.
